

August 1 – 8, 2022

This Week in STEM

Thank you to parents who have sent in items to support STEM class and other Special Area Teachers!

We are still in need of Playdough, all colors! We use this as a molding tool, like clay, as we design and build different projects! Thank you in advance for your continued support!

K-2nd Grade Classes:

We are continuing to learn about what different scientists do. We are also taking time to practice our class expectations for safety in the STEM Lab.

Home Connection: As students what a scientist is and how they can be safe in the STEM Lab.

3rd Grade Classes:

We are finishing up learning about STEM: What is STEM and how do scientists in Arizona support STEM in the desert.

Home Connection: Take a walk in the evening and look at the different flora and fauna around. Talk about how scientists in Arizona work to support our desert.

August 1 – 8, 2022

This Week in STEM

4th and 5th Grade Classes:

We are going over our STEM Contract this week. Please look for it to come home for your signature. We are completing a scavenger hunt around the STEM Lab looking for items that can help us as we learn how to be scientists and engineers.

Home Connection: Have students look around the house to find items that may help them with either science or engineering. Talk about the STEM Contract and be sure to sign it and return it to school.

6th Grades Classes:

We are learning about the Growth Mindset vs having a Fixed Mindset. We are learning about GRIT and how we can be positive, persevere, and challenge ourselves to be out best.

Home Connection: Talk to your student about having GRIT and a Growth Mindset.
