

July 22 - 29, 2022

# This Week in STEM

Welcome back to STEM Class and to the  
2022 -2023 school year!

My name is Dr. Debbie Posniack and I am so excited to be your STEM teacher again! We have an exciting year planned for each grade level that will be fun-filled, engaging, and hands-on!

## K-2nd Grade Classes:

We are learning about STEM: What is STEM and What do different types of scientists do for their work.

**Home Connection:** Enjoy having a talk with your student about different types of science that occurs within the home or how science supports what you do in your home.

## 3rd Grade Classes:

We are learning about STEM: What is STEM and how do scientists in Arizona support STEM in the desert.

**Home Connection:** Take a walk in the evening and look at the different flora and fauna around. Talk about how scientists in Arizona work to support our desert.

July 22 - 29, 2022

# This Week in STEM

## 4th Grade Classes:

We are learning about STEM: What is STEM and how do scientists in Arizona support STEM and the environment.

**Home Connection:** Take a walk in the evening and look at the different flora and fauna around. Talk about how scientists work to support our environment..

## 5th and 6th Grades Classes:

We are learning about STEM: What is STEM and what careers can students look forward to in the STEM field of work.

**Home Connection:** Talk to your student about what they're interested in pursuing at this stage. It might be something in the STEM arena. It's always a great idea to see where their current interests lay and look back later on changes that have occurred in their lives.

**Please consider donating to our Special Area classrooms. Material needs can be found on the link.**

**Thank you!** <https://www.signupgenius.com/go/10C0D4DAAAF23A5F5C61-stem1>
