

ATI Galileo Updates

Staff Logins: All staff must use the new link provided in the initial email (also listed below). It is located on the webpage and staff links. The login information is the same as their computer and Infinite Campus username/password. If staff is struggling to access ATI Galileo, do not complete the “forgot password” link within ATI Galileo. We ask that you contact the Assessment Office or the HelpDesk.

Student Logins: Here are the steps that must be completed before testing begins:

1. Students must change their computer default password **first** by logging on to a computer. This means that if students have not had the opportunity to establish a password, they must do this before their scheduled testing time. Please contact your technology teacher if you need further information.
2. On the testing day, the generic computer login may be used on testing devices. We have used these each year. This allows you to keep the computers on all day.
3. Students must access the new link to ATI Galileo. This is listed in the student links
4. Student uses their computer login to access ATI Galileo. The username/password information matches exactly. Please disregard any old login information we have used in previous years.
5. In the student portal, have students select the appropriate class from the top left side of the screen. Students will only need to complete this step once.
6. Student selects appropriate exams

Grade Level Rosters: We know at this time this may not be visible to your staff. We are currently working to resolve this issue with ATI Galileo. We expect it to be available early next week.
