

MATH DEPARTMENT TUTORING SCHEDULE 2019-2020

The teachers in the Basha Math Department are happy to offer tutoring to students who are working towards mastery of math concepts and self-sufficiency. Students should bring their notes from class when attending tutoring. If they were absent, they should obtain notes from the teachers' webpage and/or the book, to the best of their ability, before attending tutoring. Any student who attends tutoring should have made an honest independent effort to understand any concepts before they attend. Students should be prepared with specific questions or problems for the teacher in order to optimize their learning in the tutoring session.
