- **ANY** Ziplines
- **ANY** Rock Climbing Walls
- **ANY** Laser Tags

Rides Discouraged UNLESS These Guidelines Are Followed:

If the district decides to go forward with having these rides at the carnival, please have the company you will be renting from list the district as an additional insured on their insurance policy, not just a certificate holder, with a per occurrence minimum of \$1,000,000 in coverage for bodily injury and \$1,000,000 in coverage for property damage and a minimum \$2,000,000 annual aggregate. They also need to be the ones responsible for setting up, running, and dismantling the rides. Please also make sure the following are adhered to:

- Ride rental agreement is approved and signed by a person at the district who is authorized to commit the district to this liability
- Proper supervision/crowd control
- Height and weight restrictions for occupants
- Trained operators provided
- Proper electrical set-up (A generator will need to be used.)
- Elimination of slips, trips, and falls

For dunk tanks, the following guidelines should also be adhered to:

- People being dunked should be able to swim
- Only one person in the dunk tank at a time
- Suggest the person being dunked is not a student
- Should be set up to where if the tank leaks, or due to splashing, it will not enter a building or create a slip hazard
- If electrical power is required, the power cord needs to be in good repair (including a ground prong) and plugged into a GFCI protected outlet.
- A rescue or supervisor should be in the immediate area and that person should also know how to swim.
- Tank should be situated so the item being thrown to activate the dunk tank does not damage anything (e.g. windows, or other participants, bystanders, other activities)
- Follow manufacturers guidelines on filling the tank, operation of the equipment, and water changes (if necessary).

- Tubs of Fun <http://www.azbouncepro.com/tubs-of-fun.html>
