# Technology at Hull

PREPARING STUDENTS FOR THE 21ST CENTURY DIGITAL WORLD

This year marks my 15th year at Hull. Before I became the tech teacher, I taught 3rd and 6th grade here at Hull. I have a master's degree in curriculum and instruction and recently received my Computer Science endorsement for grades K-8. I am obsessed with all things digital and love to learn new things everyday! I am excited for another great year of Tech at Hull!

MRS. GERSON

WHAT WILL MY CHILD LEARN IN TECH CLASS?

- Basic Operations and Concepts
- Logins and File Management
- Word Processing and Keyboarding
- Internet Searching
- Multimedia Presentation Tools
- Spreadsheets
- Painting and Drawing Programs
- Problem Solving and Computational Thinking
- Digital Citizenship

Easy Tech powered by Learning.com is a comprehensive online curriculum used in all grades here at Hull to teach personalized digital skills.

CUSD uses both Google and Microsoft applications. Students will learn the foundational skills of both platforms. These skills include learning Google Docs, Sheets, and Slides as well as Microsoft Word, PowerPoint and Excel.

In addition to the above standards, students will also learn basic coding skills using the block coding applications in Code.Org, Scratch and Scratch Jr, Ozoblockly, and other block coding applications used in programing our robot collection.

Hull also has 2 Flashforge 3-D printers and students in grades 4-6 will use Tinkercad to create and print their own 3-D designs.
