

Wonder Quest

INSTRUCTIONS

WHAT IS A WONDER QUEST?

Wonder Quest is a system designed to help you master the art of inquiry and research, because it is based on personal interest. It will also teach you how to use search terms effectively, gather credible evidence, and navigate research databases; all of which are critical skills for post-secondary competency.

STEP-BY-STEP INSTRUCTIONS

Step 1	When you think of a question, write it down on your Wonder List.
Step 2	Categorize your wonder [use the Categories of Wonder list on the back if you're unsure]
Step 3	Look over your wonders and determine the one that you're most interested in or curious about [you can always switch to a different question if nothing comes up]
Step 4	Go to the Wonder Quest link on my website http://mychandlerschools.org/Page/85392
Step 5	Choose from the list of databases where you'll conduct your research. You MUST use one of these databases to conduct your research, so that you have credible information
Step 6	Try to find the answer to your wonder, by using effective search terms <ul style="list-style-type: none"> • Do NOT simply enter your entire question into the search box. Instead, pick out some KEY WORDS and see what comes up. • If you don't get any information that can help you to answer your wonder, then try a DIFFERENT combination of words, or SIMPLIFY your search terms.
Step 7	AFTER you have found a solid and substantial answer to your wonder, write it down in QUESTION FORM on the top line of the Wonder Quest template
Step 8	You must write down, or copy and paste, AT LEAST 5 DIRECT QUOTES [exactly as written in the article] on the lines provided [attach an extra sheet if you need more space]
Step 9	Compose your research paragraph [directions, examples, and an outline are on the back of the Wonder Quest sheet]. Remember to PARAPHRASE and PARENTHETICALLY CITE 😊

So much to offer!

The Maricopa County Library District is there not only for the needs of your students, but the needs of your classroom lessons! We have a wide range of resources that are perfect for research projects, term papers, and more. From databases to eBooks to traditional print materials, the Library is here to provide your students the tools they need to succeed. Let us introduce you to some of our services!

AEPA Test Study Guides

We are often asked for the study guides for the Arizona Educator Proficiency Assessment test, or the AEPA. We don't have print versions of the guides, however you can [find these guides online](#).

Databases

General OneFile

When you send your students to the library, you ask them to use multiple resources to obtain the best information for the project. You'll ask for magazines, journals, newspapers, and so on in order to use different research methods and provide a sweeping range of sources. Our Library has an archive of physical journals, magazines and newspapers. We can put articles from professional journals into the databases of your choice. We can do all of this through databases, newspapers, or magazines. We can do all of this through databases, newspapers, or magazines.
