What is the loop control variable?

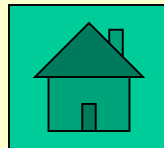

For(int x= 1; ...)
Describes x

100pts

What is priming the loop statement?

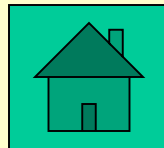

**Statement typically
preceeding the
While()**

100pts

What is a semicolon ?

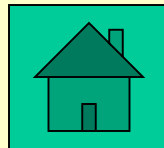

**It is after the
do while expression**

100pts

What is Nested Loops?

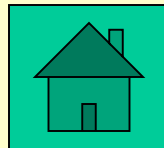

**Often used to print
math tables**

100pts

What is the test/rational expression statement?

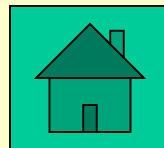

2nd expression in a For Loop

200pts

What is test/rational expression expression?

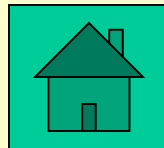

While ()
Belongs here

200pts

What is the minimum number of iterations for a
do/while?

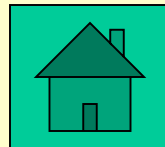

At least once

200pts

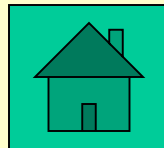

What is iterations ?

Times passing through a loop

What is loop step – (incrementing/decrementing)?

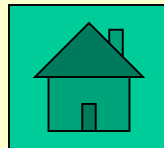

**Purpose for the third part in a
For statement**

300pts

What is the sentinel?

Special value to stop loop

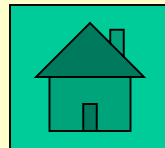

300pts

What is test condition / relational operation ?

Expression in parenthesis

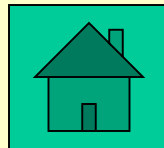

do { } while (?);

300pts

What is null?

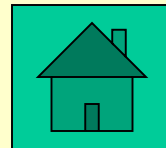

**Generated when you hit
“cancel” in JOptionPane**

300pts

What is a FOR Loop?

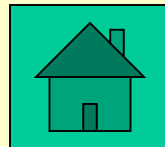

**Loop structure for
known number of iterations**

400pts

What is a WHILE or Do/While?

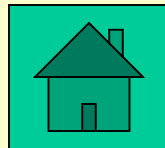

**Loop structure for
unknown number of iterations**

What is loop body?

Expression in braces

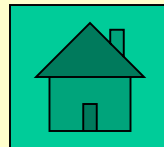

do { ? } while();

400pts

What is between the “curley” braces?

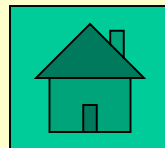

**The life expectancy of a
Local variable is...**

400pts

What is 10 ?

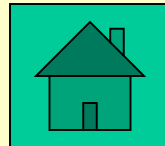

For(x = 1; x<10; x++) ;
Value of x?

500pts

What is White Space?

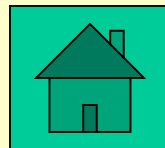

Space, tab, or newline

500pts

What is && (and)?

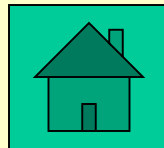

**Connects two if statements
where only one must be false
to **NOT** execute a statement**

500pts

What is compareTo() ?

**String method that returns 0,
or less than 0,
or greater than 0**

500pts
