

BHS Math Department Policy for Testing

- There will be no retakes for any tests on an individual student basis. A teacher may elect to reteach topics and then retest these topics for the entire class if they feel it will benefit the students and deepen their understanding of the concepts.
- For all courses at the Algebra II level and above there will be no test corrections made after a test has been graded and recorded that will count for points back on that specific test. The assignment may be given for homework points only.
- For courses that are giving common assessments, the test must be given within the same week as all other course of that level. The assessment scores may be shared with your students and then collected for test/quiz security.
