## How to Succeed in Math

- **Be in class every day!**
  - Make-up work is only accepted for EXCUSED absences. Late work is NOT accepted.
- **Take good notes & use them when doing homework!**
- **Do homework EVERY NIGHT!**
  - Homework is posted on my website and completed online. Go to Perry High School's website, click on "Staff," scroll down and click on my name. On my main page, you will see a link for the course calendar. **Parents, please check to see that homework has been completed (all problems are done and all work is shown)!**
- **Ask questions & fix mistakes on homework!**
  - This is the only way you get full credit on homework. Simply marking problems wrong is not enough! You must figure out what your mistake is and show me by using your red pen!
- **Study for quizzes and tests!**
  - Best way to study: Re-do the review assignment. We'll go over the review in class, so you should have all of the correct answers and work. Re-do the review assignment that night and treat it like a practice test. You can then use the original copy as your answer key. The only way you can prove that you know the material is by **DOING** the **PROBLEMS!**
- **Get help as soon as you're feeling lost or unsure!**
  - I'm available by appointment most days before and after school.
  - When I'm not available, there is also math tutoring available, through the math department, after school **MONDAY-THURSDAY**.
  - The online textbook ([www.clever.com](http://www.clever.com)) has tons of resources: extra practice, video tutorials, & live tutors.
