

Test Corrections for 3rd, 4th and 5th Grade - ELA - Lyons

- Corrections are only allowed on Friday ELA tests. Daily assignments are not included.
- Corrections are only allowed on tests that are scored BELOW 70%.
- Corrected tests will become an average of the 1st score and the corrected score. Ex: If 1st test scores 50% and 2nd test scores 90%, the recorded grade will be 70% in the gradebook.
- Corrected tests are ONLY accepted if there is a parent signature on the 1st test.
- Corrected tests MUST be returned to school the school day FOLLOWING the day the test is given to the student.
- If test is returned with corrections, but there is no parent signature, test will NOT be re-graded. Parent signature is still required, but corrections are only accepted the day after the test is given to the student with parent signature.
- If test is not returned the following school day, test will NOT be re-graded. Test will still require parent signature and need to be turned in.
- Spelling Tests will not have corrections, but will require a parent signature if score is below 70%. *If a student continually struggles with Spelling, we will conference to accommodate the student with a shorter list of words, etc.

***Note: Students are allowed to use their textbooks, workbooks, notes and dictionaries to assist them in taking these tests (not spelling). They are reminded of this each week when we have a test. Students also have **as much time as they need** to complete the tests. I encourage them to take as much time as they need.

Lastly – I do require that page numbers are written next to comprehension questions to prove where they find their answers. Not all questions have a page #, but the majority do and we expect the students to follow this direction as well.
