### **Maps: Continuity and Change**

**Part 1:** Begin by examining the oldest map in the set, Map A, which was translated from Ptolemy's 2nd-century Geography, in 1482. This map represents what was known about world geography at that time. Answer the questions below, making sure to use complete sentences.

1. According to the Map A, how detailed was knowledge of world geography in 1482?

2. How do you explain the presence/absence of detail in certain areas of the 1482 map?

**Part 2:** Examine the rest of the historical maps, paying attention to information that changes from map to map, as well as that which stays the same. Answer the questions below, making sure to use complete sentences and to include detailed references to the sources in your answers. Any time that you refer to a map, identify it by telling its "Map letter", name of the source, its author, or date published.

3. Describe examples of continuity that are visible in the maps. *(Be sure to cite the sources.)*

4. Describe examples of change that are visible in the maps. *(Be sure to cite the sources.)*

5. What is a reasonable explanation for the changes that you see throughout the maps?
