girls who
code

What is Girls Who Code?

Girls Who Code is a before-school program for 4th – 6th grade girls** to join our sisterhood of supportive peers and role models using computer science to change the world.

**Of course, boys are welcome. "Girls Who Code" is the name of the curriculum.

What will we do?

You'll learn foundational computer science concepts like functions, conditionals, variables, and loops. But you won't just learn coding skills. By working in teams to create a project, you'll learn skills like problem solving, teamwork, and communication—all the skills that engineers need in the real world!

Clubs teach girls:
