1 - Why did the Industrial Revolution first take place in England?

2 - What were some of the major inventions that changed production of goods?

3 - What were the effects of urbanization on people and cities?

Industrial Revolution

The Industrial Revolution was a series of dramatic changes not in the way that a country was governed, but in the way work was done.

FARMING:

Land owners renting farms to tenant farmers - Enclosure system

Jethero Tull invented the seed drill - this increased the number of seeds that took root and thus increased the crop yield.

Fallowing: Leaving a field unplanted every 2-3 years so that nutrients could build back up in the soil.

NOW **CROP ROTATION**

Charles Townshend - change the crop of the field every year:

Improved livestock:

Allow only the best animals to breed - weight and quality of animals increased.

Effects on Population:

Better livestock + more food = fewer people went hungry and nutrition improved.

People were healthy - had healthy children - small pox vaccine created - those children lived longer - had more children - meant there were more people to work - increased demand for food and supplies -

Cycle continues and fuels the Industrial Revolution

Britain's Advantages

1. Abundant Natural Resources:

Water Power

Coal

Iron

2. Favorable Geography:

Lots of harbors + lots of ships = able to trade with the entire world

3. Favorable Climate for New Ideas:

Royal Society - for discussing science and new inventions

Businesses were willing to invest in new inventions

4. Good Banking System:

Stable enough to loan money to business. Businesses invest in new machinery, build new factories, produce better goods, make a profit.

5. Political Stability:

Century of peace

Government encouraged economic growth

Passed laws encouraging trade

Textile Industry:

Most popular type of cloth was made from cotton

Spinners and weavers could not keep up with the demands for the cloth.

Carding Machine

Six Major Inventions:

Flying Shuttle	John Kay	<u>Allowed weaver to double the weaving speed</u>
<u>Spinning Jenny</u>	James Hargreaves	Allowed one spinner to work 6 - 8 threads
Water Frame	Richard Arkwright	<u>Used water power to drive spinning wheels</u>
Spinning Mule	Samuel Crompton	<u>Spinning jenny + water frame, made a stronger thread</u>
<u>Power Loom</u>	Edmund Cartwright	Speed up weaving process
<u>Cotton Gin</u>	Eli Whitney	Allowed pickers to pick & clean 10 x as much cotton

Child Labor:

“The displaced working classes, from the seventeenth century on, took it for granted that a family would not be able to support itself if the children were not employed.”

Children were used to set dynamite in mines and to fix looms and textile machines

Replacing bobbins on machinery

Kids At Work, Russell Freedman, Scholastic, 1994. Photo by Lewis Hine

Steam Engine:

Man by the name of James Watt saw that the steam engine worked very slowly and burned quite a bit of fuel.

He improved it soon they were being used in all the factories.

Watt is called an entrepreneur

Industry:

Canals and roads had to be built in order to transport goods to and from factories. In the 1700s and early 1800s, British workers built more than 4,000 miles of inland waterways.

The steam engine was put on wheels and became known as the railroad locomotive

Tracks were laid between cities and harbors.

People used it for personal transportation as well as the transportation of goods.

- Encouraged industrial growth
- Created millions of new jobs
- Made travel fast and efficient

City Life:

The growth of the factory system sent people flocking into cities and towns where there was work available.

Most European cities doubled in population from 1800 to 1850

PROBLEMS:

- Most streets were not paved
- Factory smoke blew past houses
- No sanitary codes
- People brought their animals with them
- Sickness was rampant
- Average life of a working class person was 17 years

WORKING CONDITIONS:

- Work day was 14 hours, 6 days a week
- Factories were poorly lit
- Buildings were dirty
- Machines would maim workers
- Coal dust caused disease

CHILDREN:

- Used in mines to get to small places
- orphan children were bought by factory owners

Parliament enacted laws that:

Made it illegal to work until age 9
9 - 13 could work 8 hrs a day
14 - 18 could work 12 hrs a day

**CLASS
SYSTEM:
The middle
class grew -**

not rich or
poor.

Laissez-faire
encouraged
Workers joined
together to ask
for better
working
conditions.
These groups
are known as
unions

What is FDA's Universe?

- In 2011, FDA:
 - Regulated \approx \$417B in domestic food products, \$49B foreign food products
 - Regulated 167,000 US food facilities; 254,000 foreign food facilities
 - Conducted 19,000 inspections of US facilities, 995 foreign inspections (\approx 2.3% of total)
 - Spent \$190M for inspections, including \$25M to states to conduct inspections

ST. JAMES, WESTMINSTER.

The GOVERNORS and DIRECTORS of the POOR
HEREBY GIVE NOTICE,

That, with the view of affording prompt and Gratuitous assistance to Poor Persons resident in this Parish, affected with Bowel Complaints and

CHOLERA,

The following Medical Gentlemen are appointed, either of whom may be immediately applied to for Medicine and Attendance, on the occurrence of those Complaints, viz.—

Mr. FRENCH, 41, Gt. Marlborough St.

(Surgery, Bow's Court, Marshall Street.)

Mr. HOUSLEY, 28, Broad Street.

Mr. WILSON, 16, Great Ryder St.

Mr. JAMES, - 49, Princes Street.

Mr. DAVIES, 25, Brewer Street.

SUGGESTIONS AS TO FOOD, CLOTHING, &c.

Regularity in the Hours of taking Meals, which should consist of any description of wholesome Food, with the moderate use of sound Beer.

Abstinence from Spirituous Liquors.

Warm Clothing and Cleanliness of Person.

The avoidance of unnecessary exposure to Cold and Wet, and the wearing of Damp Clothes, or Wet Shoes.

Regularity in obtaining sufficient Rest and Sleep.

Cleanliness of Rooms, which should be aired by opening the Windows in the middle of each day.

By Order of the Board,

GEORGE BUZZARD,

Clerk.

PARISH OFFICE, Palace Street,
26th November, 1833.

It is requested that this Paper be taken care of, and placed where it can be easily referred to.

J. BOURNE, PRINTER, 4, BRADFORD STREET, GOLDEN SQUARE.
