CRITERIA FOR JUDGING PROJECTS**

Scientific Method of Inquiry

- 0 1 2 3 4 5 A relevant question is formed.
- 0 1 2 3 4 5 Hypothesis is based on observed cause and effect relationships.
- 0 1 2 3 4 5 All materials are listed.
- 0 1 2 3 4 5 Procedures clearly outline an experiment that can be easily replicated and will prove/disprove hypothesis.
- 01 2 3 4 5 Observations/Data collection is communicated accurately through appropriate charts, graphs or tables.
- 01 2 3 4 5 Reasonableness of results are evaluated. (Did the results make sense?)
- 0 1 2 3 4 5 Conclusions are supported by data.
- 0 1 2 3 4 5 Questions for future research are evident.

Presentation

- 0 1 2 3 4 5 Is there a sensible and easy progression through the display?
- 0 1 2 3 4 5 Are all labels/titles included (title, question, hypothesis, materials, procedures, data/results, conclusions, future research)?
- 0 1 2 3 4 5 Do the graphs appropriately present data?
- 0 1 2 3 4 5 Are labels and descriptions neat, grammatically correct and sufficiently explained?

0= not presented 1=below standard 2= minimum standard 3=average 4=above standard
5=exceptional/outstanding
