## **Restaurant Menu Project Instructions**

The menus for a restaurant got destroyed when the fire sprinklers came on accidentally and caused water damage. The only thing that the owner of the restaurant could find was an old electronic file that had outdated prices.

You are to help the restaurant out by creating a new menu with new pricing. The owner has given the percentage changes for each part of the menu.

### **Creating your menu:**

Step 1: I will give you the menu items to include as well as a % increase or decrease. You will need to show your work for % increase or decrease on a separate sheet of paper.

Step 2: Choose a theme for your menu – Creativity is encouraged! You will need to write menu items with appropriate descriptions and new pricing (from Step 1).

Step 3: Neatness and readability will be very important. As you complete the menu, try and create ways to have your menu stand out from among other menus.

## **Restaurant Menu Project Scoring Rubric**

Our theme is:

\_\_\_\_\_

Rough Draft showing  
work for all computations..... (\_\_\_\_/10)

Correct adjusted prices listed  
on menu (4 per category)..... (\_\_\_\_/20)
