

Name: _____

Inventor: _____

Take Home Assignment: Inventor Report/Poster

You have been assigned to make a poster that gives some information on an inventor (please select an inventor from the provided list on page 5). You will be teaching your classmates about your inventor. Study your information carefully so you are able to thoroughly describe your inventor. You will do this research at home using this packet as a guide. Your poster and this packet will be **due on Tuesday, October 29th**. You will give an oral presentation. Presentations will be from October 29th-November 1st. Prepare for about a 2-4 minute presentation on your inventor using your poster and research/questions paper. **Make sure you practice your presentation at home**, several times before presenting to the class. You need to know your information well enough to look at your audience while you are speaking instead of turning your back to the class and reading from your poster. You may make presentation notes, but again, you must be clear and precise for your audience.

Poster Requirements:

1. The inventor's name, date and place of birth, and the number of years he/she lived.
2. A hand drawn or computer generated picture of the inventor.
3. A hand drawn or computer generated image(s) of his/her inventions.
4. **At least three** other drawings or pictures related to your inventor (i.e. symbols, objects, quotes, a timeline, involvement of other people, etc.)

NOTE: Extra 'bells and whistles' will earn you extra credit! 😊 This could mean that you dress as your inventor on your presentation day, you make a model of their invention(s), you create an activity/quiz for your classmates, etc.

Inventor Social Science Grade:

Poster (done at home) _____/50

Packet (done at home) _____/50

Oral Presentation (done at school) _____/50

5 Paragraph Essay (done at school) _____/50

Inventor Packet

(Due October 29th)

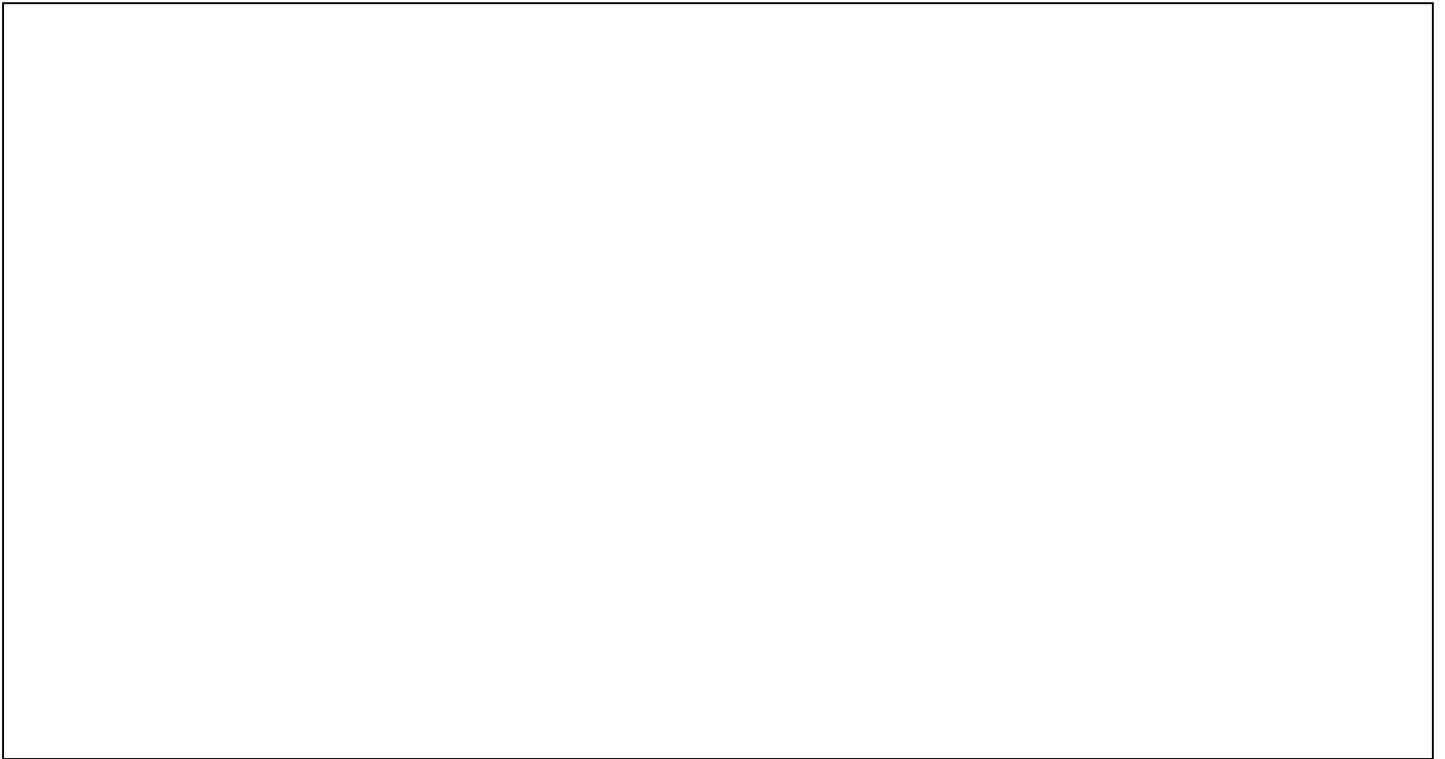

Name of Inventor _____

When was he/she born? _____

Where was he/she born? _____

Invention(s):

Picture of my Inventor:

Sequence of Events:

Create a timeline including at least 5 essential events in your inventor's life. Don't forget to include the year:

Please describe one important invention created by your inventor:

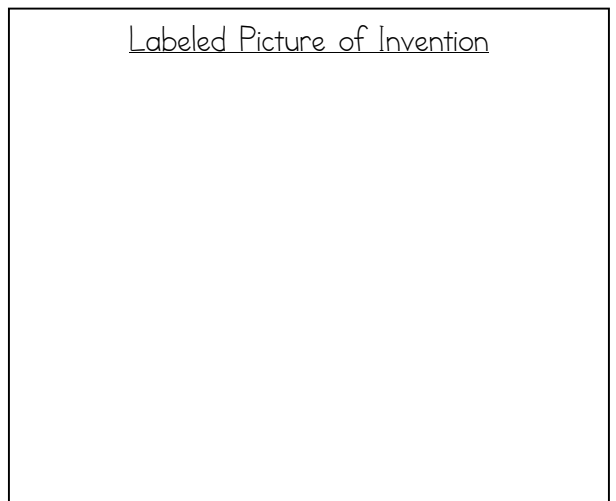

Name of Invention: _____

Year Created: _____

3 details/facts about this invention:

Did this invention make life easier, faster, or better? Why? Write in complete sentences:

Labeled Picture of Invention

My Resources: Please list any books or websites you used. There must be at least 3. When you list a book, include the author's name and the title of the book. When you list a website, list the url and a title of the article:

Select one of the following inventors:

Benjamin Banneker
Alexander Graham Bell
Rachel Carson
George Washington Carver
Francis Crick
James Watson
Marie Curie
